

The City of Greenfield and California Green Building Standards Code requires a minimum of 50% diversion of materials generated from construction and demolition (C&D) projects.

This guide will help manage the scrap-materials generated from your C&D project through recycling and source separation. Following these guideline can help you save money and comply with City/State regulations. For more Info: www.bsc.ca.gov/Home/CALGreen.aspx

Hauling Services

- ⇒ Hauling services are available through the local franchised hauler, Tri-Cities Disposal & Recycling.
- ⇒ General contractors, subs, or construction companies can self-haul by using their privately owned hauling equipment.

A list of Bonafide Recyclers is available on the city's building dept.'s website or at www.greenhalosystems.com

ALL weight receipts (recycling & disposal) MUST be retained from subs, hauling companies, or Bonafide Recyclers.

CONSTRUCTION & DEMOLITION WASTE REDUCTION AND RECYCLING GUIDE

WHY DIVERT C&D MATERIALS?

- ◆ Recycling produces usable materials at a much less environmental cost by conserving raw materials and virgin resources;
- ◆ Recycling conserves energy and water, and reduces the production of greenhouse emissions and other pollutants;
- ◆ Recycling conserves valuable landfill space; C&D materials make up 29% of all waste generated in California.
- ◆ Recycling creates employment and economic activity that helps sustain local economies;
- ◆ Recycling saves money by reducing disposal and transportation costs;
- ◆ Deconstructing (rather than demolishing) in order to recycle or reuse items (i.e. cabinets or windows) can help fulfill diversion requirements.

DIVERSION TIPS

- ◆ Develop a recycling plan before project begins
- ◆ Recycling one material may divert most of your scrap-materials. EX: wood from new construction may account for the majority of excess materials.
- ◆ Recyclable materials change during a project. Wood and steel may appear first; large quantities of cardboard at the end.

- ◆ C&D materials can be commingled or source separated. *Reduced fees may apply for source-separated materials.*
- ◆ Concrete, Asphalt, Cardboard, Plastics, Metal, Clean Wood & Yard Waste, Masonry, and Drywall can be recycled. *See city's website for a list of Bonafide Recyclers.*

COMPLIANCE WITH C&D REQUIREMENTS

The City of Greenfield requires that all C&D materials (100% of inerts and 50% of all other C&D materials) be recycled (Chapter 15.24 Greenfield Municipal Code). To comply with this requirement either:

1. Fill out the Waste Reduction & Recycling Plan/Report (available at the city's building dept's website); **OR**
2. Use on-line GreenHalo Systems Rpt: www.greenhalosystems.com

All mixed C&D and waste materials generated during a C&D project must be delivered to one of the following Salinas Valley Recycles locations:

Johnson Canyon Landfill
31400 Johnson Canyon Rd
Gonzales, CA 93926

Jolon Road Transfer Station
52654 Jolon Rd
King City, CA 93930

Upon project completion, the Waste Reduction & Recycling Plan/Report or GreenHalo Rpt and all applicable weight receipts must be submitted to the City demonstrating compliance with the C&D recycling requirements.
