CONSIDERATION

15. DISCUSSION ON THE FUTURE ORGANICS INFRASTRUCTURE AND EQUIPMENT NEEDS
(6:40) Assistant General Manager/Operation Manager Zuñiga provided a brief history of the State mandates driving the need for the further expansion of the organics program. He explained the current status of the expansion of the program with the grant monies received and detailed the foreseen challenges to meet the higher levels of division of organic waste from the landfill required by the new mandates. Mr. Zuñiga explained the needs, requirements, and benefits of a full build-out of the program. Mr. Zuñiga indicated that with the uncertainty of the decision of the City of Salinas to withdraw from the Joint Powers Agreement a full build-out is not appropriate at this time and recommended a smaller investment to cover the de-packager receiving area, a medium loader, and an elevated pick station that would allow the program to some extent expand at a low cost.

(6:52) General Manager/CAO Mathews explained the financial effects of both the elimination of waste to the landfill and the potential success of the program. He reviewed the material flow chart that demonstrated the multiple potential options for the processed material.

Board Comments: The Board discussed the presentation expressing support for the recommended conservative expansion of the program.
Public Comments: Robin Lee commented the Johnson Canyon Landfill tour. She thanked staff for the information provided and commended the Authority for the current programs, as well as the ones being developed.
Motions: By consensus the Board directed staff to obtain cost information on the recommended infrastructure and equipment needs.
