The City of Soledad and California Green Building Standards Code require a minimum of 50% diversion of materials generated from construction and demolition (C&D) projects. This guide will help manage the scrap materials generated from your C&D project through recycling and source separation. Following these guidelines can help you save money and comply with city/state regulations. For more Info: www.bsc.ca.gov/Home/CALGreen.aspx

Hauling Services

⇒ Hauling services are available through the local franchised hauler, Tri-Cities Disposal & Recycling.
⇒ General contractors, subs, or construction companies can self-haul by using their privately owned hauling equipment.

A list of Bonafide Recyclers is available at the city’s building dept. or at www.greenhalosystems.com

*ALL weight receipts (recycling & disposal) MUST be retained from subs, hauling companies, or Bonafide Recyclers.*
The City of Soledad requires that all C&D materials (100% of inerts and 50% of all other C&D materials) be recycled (Chapter 13.05 Soledad Municipal Code). To comply with this requirement either:

1. Fill out the Waste Reduction & Recycling Plan/Report (available at the city's building dept); **OR**
2. Use on-line GreenHalo Systems Rpt: [www.greenhalosystems.com](http://www.greenhalosystems.com)

All mixed C&D and waste materials generated during a C&D project must be delivered to one of the following Salinas Valley Recycles locations:

- **Johnson Canyon Landfill**
  31400 Johnson Canyon Rd
  Gonzales, CA 93926

- **Jolon Road Transfer Station**
  52654 Jolon Rd
  King City, CA 93930

Upon project completion, the Waste Reduction & Recycling Plan/Report or GreenHalo Report and all applicable weight receipts must be submitted to the city demonstrating compliance with the C&D recycling requirements.

---

**WHY DIVERT C&D MATERIALS?**

- Recycling conserves raw materials and virgin resources by producing usable materials at a reduced cost to the environment;
- Recycling conserves energy and water, and reduces the production of greenhouse emissions and other pollutants;
- Recycling conserves valuable landfill space; C&D materials make up 29% of all waste generated in California.
- Recycling creates employment and economic activity that helps sustain local economies;
- Recycling saves money by reducing disposal and transportation costs;
- Deconstructing (rather than demolishing) in order to recycle or reuse items (i.e. cabinets or windows) can help fulfill diversion requirements.

**DIVERSION TIPS**

- Develop a recycling plan before project begins.
- Track and record all weight receipts; including trash, recycling, mixed C&D, wood, salvaged materials, etc.
- Recyclable materials change during a project. Wood and steel may appear first; large quantities of cardboard at the end.
- C&D materials can be commingled or source separated. Reduced fees may apply for source-separated materials.
- Concrete, Asphalt, Cardboard, Plastics, Metal, Clean Wood & Yard Waste, Masonry, and Drywall can be recycled. See city building dept for a list of Bonafide Recyclers.

**COMPLIANCE WITH C&D REQUIREMENTS**

- The City of Soledad requires that all C&D materials (100% of inerts and 50% of all other C&D materials) be recycled (Chapter 13.05 Soledad Municipal Code). To comply with this requirement either:
  1. Fill out the Waste Reduction & Recycling Plan/Report (available at the city’s building dept); **OR**
  2. Use on-line GreenHalo Systems Rpt: [www.greenhalosystems.com](http://www.greenhalosystems.com)
