

Contact your Local Hauler to Start an  
Organics Recycling Program at your  
Business:

**Organic waste** means food waste, yard waste, landscape and pruning waste, nonhazardous wood waste, lumber, and food-soiled paper waste that is mixed in with food scraps.

**Diversion** means to use materials for a beneficial reuse instead of sending to the landfill as it's required by law.

### ***What are the Benefits?***

- \* Reduce garbage & increase organic waste diversion from landfill
- \* Potential cost savings: Organic waste has lower disposal fees than regular garbage fees
- \* Achieve sustainability goals of your business
- \* Reduce greenhouse gas emissions
- \* Comply with the laws: AB 1826, AB 827, and SB 1383

### ***How to Get Started?***

- ⇒ Schedule FREE waste assessment to determine your service levels
- ⇒ Coordinate with your hauler to provide the right food waste or yard waste bin
- ⇒ Educate employees about program and provide internal containers for collection
- ⇒ Start separating organic waste on-site

# Mandatory Organics Recycling Collection and Implementation

## SB 1383

### Short-Lived Climate Pollutants

### Requirements for Businesses

- Must arrange for organic waste recycling service and provide collection containers. Containers must be adjacent to trash containers and be easily accessible and clearly marked
- Local government must monitor containers to minimize contamination
- Enforcement actions may result for noncompliant entities

## AB 1826

### Mandatory Organics Recycling for Businesses:

- Must divert organic waste if generates **2 cubic yards or more of commercial solid waste per week** (total trash, recycling and organics)
- Must implement Organics Recycling service

## AB 827

- Requires businesses to provide customers with **recycling and/or organics recycling collection** containers to collect recyclable material generated from products purchased on the premises.
