

# Teacher Resources & Learning Opportunities

**Our resources are free online and in person for schools in our service area.**

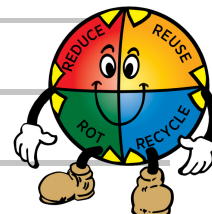

## School Food Waste Program

SVR staff is working hard to implement SB 1383 mandated food scrap recycling in all of the schools in our service area. If your school isn't recycling your food scraps in the kitchen and cafeteria yet, it is just a matter of time.

## Wally Waste-Not Grant Program

SVR offers Wally Waste-Not Grants every year to schools who pledge to be earth friendly by making positive and sustainable changes. Check our website every year to see what fun grants Wally has to offer.

## Meet Our Decomposers

One of our most popular programs is our school composting presentation. Students get to learn about different types of composting and they get to meet our live decomposers. This hands on experience exposes students to the positive attributes of our common garden critters and the reasons why composting is important for our planet.

## Facility Field Trips \* NEW EDUCATION CENTER

Make the connection between the trash can and the landfill. Students get to see where their trash goes after it leaves the curb. Tour one of our three open facilities; Jolon Transfer Station, Madison Lane Recycling Center or the Johnson Canyon Landfill. The landfill also provides opportunity to see the de-packager machine, composting facility, our methane gas to electricity facility and our big equipment in action!

## VISIT OUR NEW EDUCATION CENTER AT THE JOHNSON CANYON LANDFILL

Our brand new (opening in October 2023) Education center at the Johnson Canyon Landfill is an amazing opportunity to allow generations of youth to not only tour the landfill but to explore the landfill, our new raised garden beds, to learn how they can be stewards of the earth by recycling and reusing and tie in your classroom curriculum with cool linked learning opportunities!

## Fun Online Activities

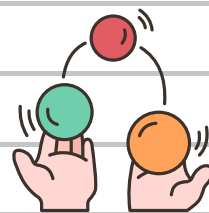

On our website's Kid's Corner, we offer links to fun and educational online games, songs, videos and books! This site is family and classroom friendly.

# Whole School Assemblies

SVR offers two assemblies for your school. Rock Steady Juggling and the EcoHero Show. Both shows are fun for all grades and focus on different types of recycling and environmental stewardship.

## Curriculum for all Grades

Our Teacher's Resources page on our website links you to many of our environmental partners from local, state and federal levels. These sites contain FREE award winning content that is sure to enrich your lessons!

## Garden & Composting Assistance

Our staff would love to come and help you with starting a new garden or reviving a neglected garden. We can help with providing finished compost, composting containers and even donate worms to get you started.

## Online Videos

We offer a ton of online videos for kids and adults. From Baby Shark with heavy machinery to virtual tours of the Johnson Canyon Landfill and Composting for Kids videos, we really do have something for everyone.

## Recycling Programs

Don't have a mixed recycling program at your school? Call us today! We can help your class start a program. We can supply bins to get you started, train kids and staff, help you build a program based on best practices and we might even have a little fun doing it!

We can specialize presentations for your class. We have crafts, games, challenges, competitions, presentations and activities for everyone. Call and see if we can help you make your lesson one to be remembered!
